**MEASUREMENT DATA GATHERING SYSTEM AND SPORT SCIENCE
MEASUREMENT DATA GATHERING SYSTEM
MITSUBISHI ELECTRIC CORP****Inventor(s): ;NAKAKUKI KANAME ;ABE MASAYUKI ;IKEDA KENICHIRO
Application No. 05288177 , Filed 19931117 , Published 19950602 ,**

Abstract: PURPOSE: To gather measurement data without changing the interface of a data base server by absorbing the change of the interface generated from a measuring device by a data gathering device.

CONSTITUTION: The athletic ability of a testee 1 is measured by measuring equipments 2 to 4 and the measurement data of the testee are respectively gathered by the data gathering devices 5 to 7 connected to the respective measuring equipments. The measurement data are sent through a LAN 9 to the data base server 10 and registered in a data base 11. By optionally processing and displaying the measurement data registered in the data base by a terminal 12 for analysis after registering the measurement data of the testee from the respective kinds of the measuring equipments, the high grade analysis of the data is performed. In such a manner, by absorbing the change of the interface generated from the measuring device by the data gathering devices 5 to 7 and gathering the data, the data base server 10 unitarily stores and manages the measurement data outputted from the plural measuring devices.
